GENERATIVE AI · CODING TRACK

Generative AI Developer

Build GenAI apps with Python, LLM APIs and RAG, and deploy them.

TRACK	DURATION	FORMAT	COURSE FEE
Coding	**3 to 6 months**	**Live online, weekdays, small batch**	**₹15,000 (full fee)**

WHO IT IS FOR

Engineering students, developers, data analysts and IT professionals moving into AI.

BEFORE YOU JOIN

Basic computer skills. Python is taught from the start; any prior coding helps.

What you will be able to do

- ✓ Write Python for AI apps, with Claude Code as your coding assistant
- ✓ Design prompts and structured outputs for apps
- ✓ Evaluate and improve LLM answers
- ✓ Call OpenAI, Gemini and Claude APIs and run open-source LLMs
- ✓ Build RAG chatbots over your own documents
- ✓ Deploy a GenAI app as an API on Google Cloud

Course path: 12 modules

1 Module 1: Python for AI

- Python basics, functions and OOP
- JSON handling and files
- Calling REST APIs
- Virtual environments and packages
- Coding with an AI assistant: Claude Code

Hands-on: A Python CLI chatbot skeleton, built with Claude Code

2 Module 2: How LLMs work

- Tokens, embeddings and context windows
- Temperature and sampling
- Popular models: GPT, Gemini, Claude, Llama
- Choosing a model: cost, speed, quality

Hands-on: Compare 3 models on the same tasks

3 Module 3: LLM APIs

- OpenAI, Gemini and Claude APIs
- System prompts and chat history
- Claude API: tool use and prompt caching
- Streaming responses
- API keys, limits and cost control

Hands-on: A chatbot that calls an LLM API

4 Module 4: Prompt engineering for developers

- Zero-, one- and few-shot prompting
- Chain of thought and prompt chaining
- Structured output and JSON schemas
- Prompt templates in code

Hands-on: Extract structured data from text into JSON

5 Module 5: Open-source LLMs

- Running models locally with Ollama
- Hugging Face models and pipelines
- When to use open vs hosted models
- Hardware basics

Hands-on: Run a local LLM and build a private chatbot

6 Module 6: Embeddings and vector databases

- What embeddings are
- Similarity search
- Chroma and Pinecone
- Metadata and filtering

Hands-on: Semantic search over a set of documents

7 Module 7: RAG: chat with your documents

- Why RAG
- Loading and chunking documents
- Retrieval and answer generation
- Citations and source tracking

Hands-on: A PDF / document chatbot

8 Module 8: LangChain for GenAI apps

- Prompts, chains and output parsers
- Retrievers and memory
- Building multi-step pipelines
- Debugging and tracing

Hands-on: Resume analyzer with LangChain

9 Module 9: Fine-tuning basics

- When to fine-tune vs prompt vs RAG
- Preparing training data
- Fine-tuning a small model
- Comparing results

Hands-on: Fine-tune a small model for a classification task

10 Module 10: Evaluation and safety

- Testing LLM outputs
- Hallucination checks
- Prompt injection and input validation
- Content safety and guardrails

Hands-on: An evaluation script for your chatbot

11 Module 11: Deployment

- Building an API with FastAPI
- Docker basics
- Deploying on Google Cloud
- Logging and monitoring costs

Hands-on: Deploy your GenAI app as an API

12 Module 12: Capstone project

- Choose a real problem
- Design, build and test
- Deploy and document
- Present your project

Hands-on: Capstone: a deployed GenAI app for your portfolio and GitHub

Tools you will use

Python · VS Code · Google Colab · OpenAI API · Gemini API · Claude API · Claude Code · Ollama · Hugging Face · LangChain · Chroma · Pinecone · FastAPI · Docker · Google Cloud · GitHub

How every module works

1 Learn the concept → 2 See a live demo → 3 Practise together → 4 Build a project → 5 Get feedback → 6 Add to portfolio

What is included

Live interactive classes · Small batch · Hands-on project in every module · Course materials · Feedback on your work · Resume and interview guidance · Certificate of Completion · Free Peaceful Living course

Reserve your seat

Message me for the next batch dates and class timings.

Trainer: Bubna Kallidukkil

Certificate of Completion is issued by BK FutureMinds AI after you finish the course, assignments and final project. It is a private training certificate, not a degree or diploma, and not accredited by any university or government body. BK FutureMinds AI is a brand of Bubna Kallidukkil, sole proprietor. The fee is the full fee; no GST is added. Tools and topics may be updated as AI tools change.
