AI AUTOMATION · CODING TRACK

AI Automation with Python

Automate with code: APIs, webhooks, scripts and LLM workflows that run on their own.

TRACK	DURATION	FORMAT	COURSE FEE
Coding	3 to 6 months	Live online, weekdays, small batch	₹15,000 (full fee)

WHO IT IS FOR
Developers, engineering students, QA, DevOps and data professionals.

BEFORE YOU JOIN
Basic computer skills. Python is taught from the start; any prior coding helps.

What you will be able to do

- ✔ Write Python scripts that automate real tasks
- ✔ Use LLM function calling inside automations
- ✔ Schedule, log and retry jobs reliably
- ✔ Work with REST APIs and webhooks
- ✔ Automate browsers and data pipelines
- ✔ Deploy automations on Google Cloud

Course path: 11 modules

1 Module 1: Python for automation

- Python basics, functions and modules
- Files, folders, CSV and Excel
- Working with dates and text
- Virtual environments

Hands-on: Rename, sort and report on a folder of files

2 Module 2: APIs and webhooks

- REST APIs, JSON and authentication
- Requests and error handling
- Receiving webhooks with FastAPI
- Rate limits

Hands-on: Pull data from a public API into a report

3 Module 3: Email, sheets and messaging

- Gmail and Google Sheets APIs
- Sending emails and alerts
- Slack and Telegram bots
- Templates for messages

Hands-on: Automated daily email report

4 Module 4: LLMs in automations

- Calling LLM APIs from Python
- Prompts for classification and extraction
- Structured output with JSON schemas
- Checking AI output

Hands-on: Email triage that classifies and drafts replies

5 Module 5: Function calling

- What function calling is
- Defining tools for the LLM
- Letting the model pick actions safely
- Human approval steps

Hands-on: An assistant that calls your own functions

6 Module 6: n8n with code

- n8n Code nodes
- Calling your own APIs from n8n
- Mixing no-code and code
- When to use which

Hands-on: An n8n workflow powered by your Python API

7 Module 7: Browser automation

- Playwright basics
- Logging in, clicking and reading pages
- Screenshots and PDFs
- Respecting site terms

Hands-on: Website change monitor with alerts

8 Module 8: Data pipelines

- Extract, transform, load
- Cleaning data with Pandas
- Storing in databases
- Scheduling pipelines

Hands-on: Automated content / data pipeline with AI summaries

9 Module 9: Reliability

- Scheduling with cron and Cloud Scheduler
- Logging, retries and alerts
- Secrets and credentials
- Testing automations

Hands-on: Add logging, retries and tests to your projects

10

Module 10: Deployment

- Docker basics
- Deploying to Google Cloud Run
- Cloud Functions for small jobs
- Monitoring cost

Hands-on: Deploy an automation API to the cloud

11

Module 11: Capstone project

- Pick a real process to automate
- Design, build and test
- Deploy and document
- Present results

Hands-on: Capstone: a deployed AI automation for your portfolio and GitHub

Tools you will use

Python | VS Code | FastAPI | Playwright | Pandas | OpenAI / Gemini / Claude APIs | n8n | Docker | Google Cloud | GitHub

How every module works

1	2	3	4	5	6
Learn the concept	See a live demo	Practise together	Build a project	Get feedback	Add to portfolio

What is included

Live interactive classes | Small batch | Hands-on project in every module | Course materials | Feedback on your work | Resume and interview guidance | Certificate of Completion | Free Peaceful Living course

Reserve your seat

Message me for the next batch dates and class timings.

Trainer: Bubna Kallidukkil

Certificate of Completion is issued by BK FutureMinds AI after you finish the course, assignments and final project. It is a private training certificate, not a degree or diploma, and not accredited by any university or government body. BK FutureMinds AI is a brand of Bubna Kallidukkil, sole proprietor. The fee is the full fee; no GST is added. Tools and topics may be updated as AI tools change.
