AGENTIC AI · NO-CODE TRACK

Build AI Agents without Code

Create AI agents that plan, use tools and remember, using no-code builders.

TRACK	DURATION	FORMAT	COURSE FEE
No-code	3 months	Live online, weekdays, small batch	₹10,000 (full fee)

WHO IT IS FOR
Managers, consultants, founders, product and business teams, and anyone curious about AI agents.

BEFORE YOU JOIN
None. Taking Generative AI for Everyone or No-Code AI Automation first helps.

What you will be able to do

- ✔ Explain what AI agents are and when to use them
- ✔ Build agents with the n8n AI Agent and custom GPTs
- ✔ Add human approval and safety checks
- ✔ Design an agent: goal, tools, memory, guardrails
- ✔ Connect agents to apps and data, including with MCP
- ✔ Pick the right agent for a business task

Course path: 10 modules

1 Module 1: What AI agents are

- Chatbot vs automation vs agent
- How agents plan, act and check
- Real business examples
- Limits and risks

Hands-on: Map 3 tasks in your work that suit an agent

2 Module 2: Designing an agent

- Goal, instructions and persona
- Tools the agent can use
- Memory and knowledge
- Success checks

Hands-on: An agent design canvas for your use case

3 Module 3: Custom GPTs with actions

- Instructions and knowledge files
- Actions that call other apps
- Testing and improving
- Sharing with a team

Hands-on: A custom GPT that looks up and answers from your data

4 Module 4: n8n AI Agent

- The n8n AI Agent node
- Giving the agent tools: search, sheets, email
- Chat memory
- Triggers and schedules

Hands-on: A research agent in n8n

5 Module 5: Knowledge and memory

- Connecting documents and websites
- No-code RAG basics
- Short- and long-term memory
- Keeping answers accurate

Hands-on: A customer support agent on your FAQ and policies

6 Module 6: Connecting agents with MCP

- What MCP (Model Context Protocol) is
- Using MCP connectors in Claude and other tools
- Connecting files, calendars and apps
- Permissions and safety

Hands-on: A personal assistant agent connected to your apps

7 Module 7: Multi-step and multi-agent workflows

- Planner and worker agents
- Hand-offs between agents
- Combining agents with automations
- When one agent is enough

Hands-on: A meeting-notes-to-action-items agent workflow

8 Module 8: Guardrails and human-in-the-loop

- Approval steps before actions
- Limiting what agents can do
- Checking output quality
- Logs and audit trails

Hands-on: Add approvals and checks to your agents

9 Module 9: Agents for business functions

- Sales and lead follow-up
- HR and recruitment
- Finance and reporting
- Customer support

Hands-on: A sales follow-up agent

10

Module 10: Capstone: an agent for a real task

- Choose a real problem
- Design, build and test
- Measure results
- Present and plan rollout

Hands-on: Capstone: a working AI agent, presented live

Tools you will use

n8n AI Agent | ChatGPT custom GPTs | Claude (Projects and MCP connectors) | Google Gemini | Google Sheets | Gmail | Slack

How every module works

1	2	3	4	5	6
Learn the concept	See a live demo	Practise together	Build a project	Get feedback	Add to portfolio

What is included

Live interactive classes | Small batch | Hands-on project in every module | Course materials | Feedback on your work | Resume and interview guidance | Certificate of Completion | Free Peaceful Living course
